

# DashDAQ

**A full color touch screen, all-in-one dashboard that simply plugs into your vehicles OBD2 port and can:**

**Gauges**

Show generic OBD2 data as well as OE manufacturer specific OBD2 data, up to 2000 parameters. Any type of information that the manufacturer sends to the OBD2 port can be viewed on DashDAQ.

**OBD2 Diagnostics**

Read diagnostic trouble codes. Not only does it read the DTC's (diagnostic trouble codes), but it also gives clear, concise explanations of codes

**Fuel Economy**

Track your fuel economy in real time advising you of bad driving habits that can be corrected to improve your vehicles fuel efficiency

**Performance**

Give performance data like reaction times, ET, and speed in 1/4 mile, 1/8 mile, and 0 to 60mph increments. It can also show deceleration, or braking data.

**Data Logger**

Record everything that's attached to it either through the OBD2 port or added analog sensor inputs and save up to 4GB of data for analysis later

**Customize**

Take complete control of design with six standard graphical views or unlimited graphic-design potential through Drew Technologies patent pending Skin Editor system.

**Entertainment**

Play your MP3 files, digital video, or even video games with amazing clarity on its 480 x 272 resolution and 24 bit color display.

**GPS**

Offer voice-guided turn by turn Navigation with both US and International maps. Includes thousands of points of interest that include restaurants, gas stations, and more

Simple plug and play installation through your vehicles OBD2 port for practically any OE manufacturer. Can be added on to many aftermarket EFI systems (see back for a list of mfrs.)
